WORK EXPERIENCE

YANDEX - Intern Java/Kotlin Backend developer

Jun 2022 - Sep 2022

During the work I made: imports for the starting missions, validation for them, wrote mapping requests, integrated with GraphQL, added entities for the admin, wrote authorization through internal token, corrected errors, wrote the exception handler and etc. [Recommendation letter](#)

CertifyMe - Co-Founder of a start-up in NFT & Kotlin Backend developer

Mar 2023 - ongoing

Co-founder of a start-up project in NFT in cooperation with an IT-engineer master degree graduate of ISEN(France) The project is aimed at work experience validation via blockchain technology. In the project I am engaged in backend development of microservices.
